

The University of Warwick Sports Bursaries and Swimming Scholarship Programme

If you are competing in sport at a high standard and are either currently a University of Warwick student, or you are planning to study at the University, then our sports award scheme could offer you financial support during your studies to further your sporting success.

■ Swimming Scholarship

The new Swimming Scholarship scheme is being offered in conjunction with the City of Coventry Swimming Club. We are able to offer a scholarship to an elite level student to the value of £1,000. The scholarship will fund the registration fees for the Elite Group of the City of Coventry S.C., plus physiotherapy and other sports science support. This group currently has a number of international standard swimmers.

The scholarship will be awarded on the basis of Long Course performances in Olympic Programme events, graded against International points as well as demonstrated commitment levels.

■ Department of Physical Education and Sport Bursaries

These Bursaries are available to University of Warwick students who are competing at a national standard in their chosen sport, or by their presence in National or Regional training squads.

■ Sports Federation Bursaries

These Bursaries are similarly available to University of Warwick students who are competing at a representative level in national student sports competitions.
